

Ejaz Ashraf

Frontend Developer | Full-Stack Engineer

✉ ejazashraf933@gmail.com ☎ [+923418973933](tel:+923418973933) 📍 Lahore Pakistan 🌐 [LinkedIn](#) 📁 [Portfolio](#)

Summary

Software Engineer with 4+ years of experience building full-stack web and mobile applications at [Kcube.ai](#). Shipped workforce management portals, an AI-powered memory platform, and cross-platform mobile apps serving thousands of users. Specialize in React.js, Angular, and TypeScript on the frontend with FastAPI and Python on the backend, focused on secure authentication (Azure B2C, OAuth 2.0) and scalable API-driven architectures.

Education

University Of Azad Jammu & Kashmir MZD	Bachelor of Science(BSSE) • 3.1 / 4.0
Software Engineering	Muzaffarabad, Azad Jammu & Kashmir, Pakistan • 2015-2019

Experience

Kcube.ai	Lahore
Software Engineer	4+ Years

- Built and shipped 4 production applications (ALA Web Portal, ALA Mobile App, CoreMemories AI, APR System) across web and mobile platforms using Angular, React, and React Native
- Optimized application performance through code splitting, lazy loading, and bundle optimization, cutting initial load time by 50%
- Designed and developed backend APIs using FastAPI and Python for efficient data handling across multiple client projects
- Implemented secure authentication and authorization flows using Azure B2C, OAuth 2.0, and Apple Sign-In with role-based access control

Projects

<u>ALA Portals & Mobile App — Agri-Labour Australia</u>	Angular React Native TypeScript Azure B2C
---	---

Cross-platform mobile app used by thousands of agricultural workers across Australia for job applications, document management, payroll tracking, and compliance.

- Built cross-platform mobile app using React Native and Expo with modules for candidate profiles, job tracking, payroll history, and compliance — published on both Play Store and App Store
- Integrated DocuSign API and Azure Blob Storage for in-app digital signature collection and secure document management of employment contracts and certifications
- Created interactive training modules (videos, PDFs, quizzes) and optimized API communication using TanStack Query for efficient data fetching and offline-ready caching

<u>CoreMemories AI</u>	React Native React Expo TypeScript TanStack Query
------------------------	---

AI-powered personal memory management platform with a React Native mobile app and React web application for capturing, organizing, and resurfacing user memories.

- Built the Flutter mobile app and React web frontend, implementing secure authentication via Facebook and Apple Sign-In with token-based session handling
- Designed interactive onboarding flow with personality quizzes, voice recording, and scheduling features — driving user engagement from first launch
- Integrated REST APIs for memory data management and PostHog analytics for user behavior tracking and retention optimization

APR System

React | TypeScript | FastAPI | PostgreSQL | Stripe

Full-stack AI-powered legal case management SaaS with RAG-based AI chat, subscription billing, digital signing, and multi-language support.

- Built the full-stack application with React frontend and FastAPI backend, implementing case management workflows with AI-powered chat using RAG for intelligent legal document retrieval
- Developed Stripe subscription system with tiered plans, feature toggles per plan, OAuth (Google), and two-factor authentication
- Implemented digital document signing with PDF generation, Calendly scheduling integration, and i18next multi-language support across the platform

Skills

📱 Frontend | Mobile

React Native, React.js, Angular, TypeScript, JavaScript (ES6+), Redux, RxJS, TanStack Query

🎨 Styling

Tailwind CSS, SCSS, Material UI, Angular Material, Bootstrap

🖥️ Backend

FastAPI, Python, PostgreSQL

🔧 Tools & Deployment

Git, Azure B2C, Docker, PostHog, DocuSign API, EAS Build, Play Store, App Store

Awards

Employee of the Quarter (2x) — Kcube AI

Recognized twice for delivering high-impact projects and technical leadership across cross-functional teams
