

Ejaz Ashraf

Frontend Developer (React.js, Angular) | Full-Stack Engineer | 4+ Years Experience | API Integration & Scalable Applications

✉ ejazashraf933@gmail.com ☎ [03418973933](tel:03418973933) 📍 Lahore

Summary

Results-driven Software Engineer with 4+ years of experience specializing in frontend and full-stack development. Skilled in building scalable, high-performance web applications using React.js, Angular, and TypeScript, along with backend API development using FastAPI. Experienced in developing responsive user interfaces, integrating REST APIs, and implementing secure authentication systems. Proven ability to deliver end-to-end solutions, optimize application performance, and collaborate effectively within Agile teams. Passionate about writing clean, maintainable code and building user-focused digital products.

Education

University Of Azad Jammu & Kashmir MZD	BSSE • 3.1
Software Engineering	Muzaffarabad Azad Kashmir • 2015-2019

Experience

Kcube.ai	Lahore
Software Engineer	4+ Years

- Developed and maintained scalable web applications using React.js and Angular, serving thousands of active users
- Built responsive and user-friendly interfaces with a focus on performance and usability
- Integrated RESTful APIs and implemented secure authentication systems (OAuth, Azure B2C, token-based auth)
- Designed and developed backend APIs using FastAPI for efficient data handling and system performance
- Collaborated with cross-functional teams including backend, QA, and product teams in an Agile environment
- Optimized application performance, reducing load times and improving overall user experience
- Contributed to code reviews, debugging, and continuous improvement of existing applications

Projects

Angular | React Native

Developed a comprehensive cross-platform portal system consisting of a mobile application and enterprise web platform to manage candidate lifecycle, job processing, payroll, and compliance workflows.

Key Contributions:

- Built a cross-platform mobile application using React Native and Expo for iOS and Android
- Developed a scalable enterprise web application using Angular and TypeScript
- Implemented candidate profile management, job tracking, and compliance modules across both platforms
- Designed and integrated payroll system including payment history, financial data handling, and bank account management
- Built admin portal for HR operations, client management, and workflow automation
- Integrated digital signature workflows using DocuSign API
- Developed document management system using Azure Blob Storage
- Implemented secure authentication with Azure B2C
- Created interactive training modules (videos, PDFs, quizzes) within the mobile app
- Optimized API communication and state management using TanStack Query (mobile) and RxJS (web)
- Designed responsive UI using Angular Material for seamless user experience across devices

CoreMemories AI — AI-Powered Personal Memory Management

Role: Flutter Developer

Platform: Google Play Store

- Developed a cross-platform mobile application using Flutter for AI-based personal memory management
- Implemented secure authentication using Facebook and Apple Sign-In with token-based session handling
- Designed and built onboarding flow including personality quizzes, voice recording, and scheduling features
- Integrated REST APIs for authentication and memory data management
- Implemented user behavior tracking using PostHog analytics to improve engagement
- Configured native capabilities (iOS entitlements & Android manifest) and local storage using SharedPreferences

Technologies: Flutter, Dart, REST APIs, PostHog, Facebook Auth, Apple Sign-In, SharedPreferences, Dio
